چیرمین کی جائزہ رپورٹ

معزز سرٹیفکیٹ ہولڈرز

مجھے فرسٹ النور مضاربہ کے سرٹیفکیٹ ہولڈرز کے سامنے 30 جون 2023 کو ختم ہونے والے سال کے آڈٹ شدہ مالیاتی گوشواروں کے ساتھ کہنی کی مالی کارکردگی کا جائزہ پیش کرتے ہوئے خوشی ہو رہی ہے۔

30 جون 2023 کو ختم ہونے والا مالی سال پورا سال افسردہ رہا۔ ملکی معیشت اور بڑے تجارتی شراکت داروں دونوں میں مشکل معاشی ماحول کی وجہ سے ملک کی جی ڈی پی کی شرح نمو 6.10 فیصد سے 0.29 فیصد ہو گئی۔

بورڈ آف ڈائریکٹرز کی جانب سے، میں تمام ٹیم کے تعاون کا اعتراف کرنا چاہتا ہوں جو بحرانوں کو سنبھالنے کے لیے ان کی محنت کے لیے اور اللہ سبحانہ و تعالیٰ سے مضاربہ کی کامیابی اور ترقی کے لیے دعا کرتا ہوں۔

Economic Review and Review of Operations

Pakistan's economy posted GDP growth from a revised 6.10% in 2021-2022 to 0.29% in 2022-2023, a massive decline. This caused by the difficult economic environment both at home economy and major trading partners has hampered the economic growth as well as weak participation from the development partner and resource difficulties.

In the international scenario, the prolonged Russia-Ukraine conflict adversely affected global growth and inflation more than expected. Thus, the increased international prices affect currencies, commodities, and production costs while there are three pass-through effects in the economy of Pakistan. The current account deficit for the period July-June 2023 dropped to US \$ 2.6 billion while the average CPI inflation rose to 29.40%. This led the State Bank of Pakistan to raise the policy rate to 22 percent as part of monetary tightening.

The numerous economic and political factors had an impact on the Pakistan Stock Exchange and the investors usually seem bearish during the financial year. From FY 23 perspective, the first half of the year showed a slump of nearly 3 percent in the KSE 100 index whereas the index improved in the second half of the year to nearly the previous financial year.

Future Outlook

Modaraba since FY22, commenced its commodity trading business as well as secondary market operations in order to attain its growth momentum. During FY 23, the depressing internal, external economic and political factors, the overall business environment remained under pressure, however, the management anticipates a better business environment during FY24 which will ultimately yield better results.

Shariah Perspective

Islamic finance derives its value proposition from the application of Shariah contracts and processes in financial and non-financial transactions that provide for different risks and return profiles. In spite of all difficulties, management remains observant to uphold these Shariah principles.

A complete Shariah Audit report of Shariah Advisor for the year ended June 30, 2023, is also attached with the annual report.

**The Board of Directors and Audit Committee**

No change has taken place within the Board of Directors of the Al-Noor Modaraba Management (Private) Limited, the Management Company of First Al-Noor Modaraba since the Directors' report for the year ended June 30, 2022:

مستقبل کا آڈٹ لک

مضاربہ نے مالی سال 22 سے اپنی ترقی کی رفتار کو حاصل کرنے کے لیے اپنے کوڈڈی ٹریڈنگ کے کاروبار کے ساتھ ساتھ سیکڑری مارکیٹ آپریشنز کا آغاز کیا۔ مالی سال 23 کے دوران مایوس کن اندرونی، بیرونی معاشی اور سیاسی عوامل کی وجہ سے مجموعی کاروباری ماحول دباؤ میں رہا، تاہم، انتظامیہ مالی سال 24 کے دوران بہتر کاروباری ماحول کی توقع رکھتی ہے جس کے باوجود بہتر نتائج برآمد ہوں گے۔

شرعی طائر

اسلامی مالیات اپنی قدر کی تجویز کو شرعی معاہدوں کے اطلاق اور مالیاتی اور غیر مالیاتی لین دین کے عمل سے حاصل کرتا ہے جو مختلف خطرات اور واہی کے پرفائل فراہم کرتے ہیں۔ تمام تر مشکلات کے باوجود انتظامیہ ان شرعی اصولوں کو برقرار رکھنے کے لیے پرعزم ہے۔

30 جون 2023 کو ختم ہونے والے سال کے لیے شریعہ ایڈوائزر کی ایکٹ مکمل شریعہ آڈٹ رپورٹ بھی سالانہ رپورٹ کے ساتھ منسلک ہے۔

بورڈ آف ڈائریکٹرز اور آڈٹ کمیٹی

30 جون 2023 کو ختم ہونے والے سال کے لیے ڈائریکٹرز کی رپورٹ کے بعد سے پہلی انور مضاربہ کی مینجمنٹ کمپنی انور مضاربہ مینجمنٹ (پرائیویٹ) لمیٹڈ کے بورڈ آف ڈائریکٹرز میں کوئی تبدیلی نہیں ہوئی ہے۔

ڈائریکٹرز کی تربیت اور واقفیت

انسٹی ٹیوٹ آف چارٹرڈ اکنامسٹس آف پاکستان (ICMAP) اور انسٹی ٹیوٹ آف بزنس ایڈمنسٹریشن (IBA) میں چند تربیت یافتہ ڈائریکٹرز کی اکثریت ڈائریکٹرز ٹریننگ سرٹیفکیٹ کی ضروری ضروریات کی تکمیل کرتی ہے۔

سرٹیفکیٹ ہولڈرز کا نمونہ

مضاربہ کے سرٹیفکیٹ ہولڈنگ کا نمونہ اور 30 جون 2023 تک کی اضافی معلومات کو ظاہر کرنے والا ایکٹ بیان اس رپورٹ میں شامل ہے۔

کارپوریٹ اور مالیاتی رپورٹنگ فریم ورک ڈائریکٹرز کو سیکورٹیز اینڈ ایکسچینج کمیشن پاکستان (SECP) کے کارپوریٹ اور مالیاتی رپورٹنگ فریم ورک اور کوڈ آف کارپوریٹ گورننس کی ترمیم کی تصدیق کرتے ہوئے خوشی ہوئی ہے:

- مالیاتی بیانات، جو مضاربہ کے انتظام کے ذریعہ تیار کیے گئے ہیں، اس کے معاملات کی حالت، اس کے کاموں، نقد بہاؤ اور لیکویٹی میں تبدیلیوں کے نتائج کو منصفانہ طور پر پیش کرتے ہیں۔

- مضاربہ کے حساب کتاب کی مناسب کتابیں رکھی گئی ہیں۔

- مالیاتی بیانات کی تیاری میں مناسب ہاؤٹنگ پالیسیوں کا مسلسل اطلاق کیا گیا ہے۔ استعمال شدہ ہاؤٹنگ تخمینے معقول اور دانشمندانہ فیصلے پر مبنی ہیں۔

- بین الاقوامی مالیاتی رپورٹنگ اسٹینڈرڈز (IFRS)، جیسا کہ پاکستان میں مدارس پر لاگو ہوتا ہے، مالیاتی گوشواروں کی تیاری میں بیرونی کی گئی ہے اور وہاں سے کسی بھی روانگی کا مناسب طور پر انکشاف کیا گیا ہے۔ مزید برآں، مضاربہ کی انتظامیہ منصفانہ مالیاتی رپورٹنگ کو فروغ دینے کے لیے ممکنہ حد تک IFRS کی غیر محفوظ ترمیم کی تعریف کرتی ہے۔

30 جون 2023 کو ختم ہونے والے سال کے لیے مضاربہ کمپنی کے ڈائریکٹرز کی اکتیسویں رپورٹ

النور مضاربہ منجمنٹ (پرائیویٹ) لمیٹڈ کے بورڈ آف ڈائریکٹرز کی جانب سے، فرسٹ النور مضاربہ (ایف اے ایم) کی "مداربہ" انتظامی کمپنی - ہمیں اکتیسویں سالانہ رپورٹ کے آڈٹ شدہ مالیاتی گوشواروں کے ساتھ پیش کرتے ہوئے خوشی ہو رہی ہے۔ 30 جون 2023 کو ختم ہونے والے سال کے لیے ہیں:

اقتصادی جائزہ اور آپریشنز کا جائزہ

پاکستان کی معیشت نے جی ڈی پی کی نمو 2021-2022 میں نظر ثانی شدہ 6.10 فیصد سے 2022-2023 میں 0.29 فیصد تک پہنچائی، جو کہ بہت زیادہ کم ہے۔ گھریلو معیشت اور بڑے تجارتی شرکت داروں دونوں میں مشکل معاشی ماحول کی وجہ سے اس نے اقتصادی ترقی کے ساتھ ساتھ ترقیاتی پارٹنر کی کمزور شرکت اور وسائل کی مشکلات کو روکا ہے۔

بین الاقوامی منظر نامے میں، روس-یوکرین کے طویل تنازع نے عالمی نمو اور افراط زر کو توقع سے زیادہ متاثر کیا۔ اس طرح بین الاقوامی قیمتوں میں اضافہ کرنسیوں، اجناس اور پیداواری لاگت کو متاثر ہوئی ہیں جبکہ پاکستان کی معیشت پر تین ضمنی اثرات مرتب ہوئے ہیں۔ جولائی تا جون 2023 کی مدت میں کرنٹ اکاؤنٹ خسارہ 2.6 بلین امریکی ڈالر تک چلا گیا جبکہ اوسط CPI افراط زر 29.40 فیصد تک بڑھ گیا۔ اس وجہ سے اسٹیٹ بینک آف پاکستان نے مائیکرو پالیسی ریٹ کو 22 فیصد تک بڑھا دیا۔

پاکستان اسٹاک ایکسچینج پر متعدد معاشی اور سیاسی عوامل کا اثر پڑا اور مالی سال کے دوران سرمایہ کار عموماً مندی کا مظاہرہ کرتے رہے ہیں۔ مالی سال 23 کے تناظر میں، سال کی پہلی ششماہی نے KSE 100 انڈیکس میں تقریباً 3 فیصد کمی ظاہر کی جبکہ سال کی دوسری ششماہی میں انڈیکس تقریباً پچھلے مالی سال کے مقابلے میں بہتر ہوا۔

The responsibility for compliance with the Regulations is that of the Board of Directors of the Modaraba Management Company. Our responsibility is to review whether the Statement of Compliance reflects the status of the Modaraba's compliance with the provisions of the Regulations and report if it does not and to highlight any non-compliance with the requirements of the Regulations. A review is limited primarily to inquiries of the Modaraba's personnel and review of various documents prepared by the Modaraba Management Company to comply with the Regulations.

As a part of our audit of the financial statements we are required to obtain an understanding of the accounting and internal control systems sufficient to plan the audit and develop an effective audit approach. We are not required to consider whether the Board of Directors' statement on internal control covers all risks and controls or to form an opinion on the effectiveness of such internal controls, the Modaraba Management Company's corporate governance procedures and risks.

The Regulations require the Modaraba Management Company to place before the Audit Committee, and upon recommendation of the Audit Committee, place before the Board of Directors for their review and approval, its related party transactions. We are only required and have ensured compliance of this requirement to the extent of the approval of the related party transactions by the Board of Directors upon recommendation of the Audit Committee.

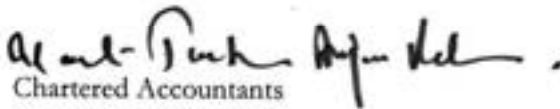

Based on our review, nothing has come to our attention which causes us to believe that the Statement of Compliance does not appropriately reflects the Modaraba Management Company's compliance, in all material respects, with the requirements contained in the Regulations as applicable to the Modaraba for the year ended June 30, 2023.

Certain new standards, amendments and interpretations have been issued by the International Accounting Standards Board (IASB) which are yet to be notified by the SECP for the purpose of applicability in Pakistan.

5 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**5.1 Investment in associates**

The Modaraba considers its associate to be such in which the Modaraba have ownership of not less than twenty percent of the voting power and / or has significant influence through common directorship, but not control.

The Modaraba accounts for its investment in associate using the equity method. Under this method investment is initially recognized at cost, being the fair value of consideration given includes acquisition charges associated with such investments. Subsequently the investors' share in profit / loss of the Investee is recognized in profit and loss. Distributions received from the investee reduce the carrying amount of the investment. Adjustment to the carrying amount will also be made for changes in the investor's proportionate interest in the investee arising from changes in the investee's over comprehensive income.

Where Modaraba's share of loss of an associates equal or exceeds its interest in the associates, the Modaraba discontinue to recognize its shares of further losses except to the extent that Modaraba has incurred legal or constructive obligation or made payment on behalf of the associates. If the associates subsequently reports profits, the Modaraba resumes recognizing its share of those profit only after its share of the profit equals the share of losses not recognized.

5.2 Financial Instruments- Initial recognition and subsequent measurement

5.2.1 Initial recognition

All financial assets and liabilities are initially measured at cost which is the fair value of the consideration given or received. These are subsequently measured at fair value, amortized cost of cost as the case may be.

5.2.1.1 Classification of financial assets

IFRS 9 has the following categories for classification of financial assets:

- Debt instruments at amortized cost.
- Debt instruments at fair value through other comprehensive income (FVOCI), with recycling of gains or losses to profit and loss account on derecognition.
- Equity instruments at FVOCI, with no recycling of gains or losses to profit and loss account on derecognition.
- Financial assets at fair value through profit or loss (FVTPL).

The classification is based on true criteria which is the entity's business model for managing the assets; and b) whether the instruments contractual cashflows represent 'solely payments of principal and profit' on the principal amount outstanding.

5.2.1.2 Classification of financial liabilities

The Modaraba classified its financial liabilities in the following categories:

- at fair value through profit or loss (FVTPL); or
- at amortized cost.

Financial liabilities are measured at amortized cost, unless they are required to measured at FVTPL (such as instruments held for trading or derivatives) or the Modaraba has opted to measure them at FVTPL.

5.2.2 Subsequent measurement

Financial assets at FVTOCI

Elected investments in equity instruments at FVTOCI are initially recognized at fair value plus transaction costs. Subsequently, they are measured at fair value, with gains or losses arising from changes in fair value recognized in other comprehensive income.

Financial assets and liabilities at amortised cost

Financial assets and liabilities at amortized cost are initially recognized at fair value and subsequently carried at amortized cost, and in the case of financial assets, less any impairment.

Financial assets and liabilities at FVTPL

Financial assets and liabilities carried at FVTPL are initially recorded at fair value and transaction costs are expensed in the profit and loss account. Realised and unrealised gains and losses arising from changes in the fair value of the financial assets and liabilities held at FVTPL are included in the statement of profit and loss account in the period in which they arise.

5.2.3 Impairment of financial assets

The Modaraba assesses on a forward-looking basis the Expected Credit Losses (ECL) associated with its debt instruments carried at amortized cost and FVOCI. The Modaraba recognises a loss allowance for such losses at each reporting date. The measurement of ECL reflects:

- An unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- The time value of money; and
- Reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

A default on a financial asset is when the counterparty fails to make contractual payments within 90 days of when they fall due.

The Modaraba applies the IFRS 9 general approach to measure Expected Credit Losses (ECL) for ijarah finance and diminishing musharakah. A lifetime ECL is recorded on Ijarah finance and diminishing musharakah in which there has been Significant Increase in Credit Risk (SICR) from the date of initial recognition and which are credit impaired as on the reporting date. A 12 months ECL is recorded for ijarah finance and diminishing musharakah which do not meet the criteria for SICR or "credit impaired" as at the reporting date. To assess whether there is a significant increase in credit risk the Modaraba compares the risk of a default occurring on the asset as at the reporting date with the risk of default as at the date of initial recognition. The Modaraba also considers reasonable and supportive forwarding-looking information in determination of ECL. The allowance is increased by provisions charged to profit and loss account and other comprehensive income and is decreased by charge-offs, net of recoveries.

In evaluating the adequacy of ECL, the management considers various factors, including the nature and characteristics of the obligor, current economic conditions, credit concentrations or deterioration in collateral, historical loss experience and delinquencies.

The Modaraba Regulations, 2021 specifies a criteria for classification and provisioning of impaired assets. The Modaraba while recognising provision for impaired assets has considered the amount which is higher of (on a customer basis):

- the provision required under the Modaraba Regulations, 2021; and
- the provision required under IFRS 9 using the Expected Credit Loss (ECL) model.

5.2.4 Derecognition

5.2.4.1 Financial assets

The Modaraba derecognizes financial assets only when the contractual rights to cash flows from the financial assets expire or when it transfers the financial assets and substantially all the associated risk and rewards of ownership to another entity. On derecognition of a financial asset measured at amortized cost, the difference between the asset's carrying value and the sum of the consideration received or receivables is recognized as gain/ (loss). In addition, on derecognition of an investment in a debt instrument classified as at FVTOCI, the cumulative gain or loss previously accumulated in the investments revaluation reserve is reclassified to profit and loss account. In contrast, on derecognition of an investment in equity instrument which the Modaraba has elected on initial recognition to measure at FVTOCI, the cumulative gain or loss previously accumulated in the investments revaluation reserve is not reclassified to profit and loss account, but transferred to statement of changes in equity.

5.2.4.2 Financial liabilities

The Modaraba derecognizes financial liabilities only when its obligations under the financial liabilities are discharged, cancelled or expired. The difference between the carrying amount of the financial liability derecognized and the consideration paid and payable, including any non- cash assets transferred or liabilities assumed, is recognized in the profit and loss account.

5.2.5 Offsetting of financial assets and financial liabilities

Financial assets and liabilities are offset and the net amount is reported in the balance sheet when there is a legally enforceable right to set-off the recognized amounts and the Modaraba intends to either settle on a net basis, or to recognize the asset and settle the liability simultaneously.

5.3 Regular way contracts

All purchases and sales of securities that require delivery within the time frame established by regulation or market convention such as 'T+2' purchases and sales are recognised at the trade date. Trade date is the date on which the Modaraba commits to purchase or sell the assets.

5.4 Receivable from terminated / matured contracts

These are stated net of impairment loss. Impairment loss is recognised for doubtful receivables on the basis of Prudential Regulations for Modarabas issued by the SECP or based on the judgment of management, whichever is higher. Bad debts are written off when identified.

5.5 Diminishing musharakah, Ijarah rentals and Musawamah finance

These are stated net of provision and suspense income. Provision is recognized in accordance with the Modaraba Regulations, 2021 for Modarabas. Bad debts are written-off when identified.

5.6 Fixed assets in own use

These are stated at cost less accumulated depreciation and accumulated impairment losses, if any except free hold land are stated at cost less any accumulated impairment losses, if any. Cost includes expenditure that is directly attributable to the acquisition of the items. Subsequent costs are included in the assets' carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Modaraba and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the profit and loss account as and when incurred.

Depreciation on all fixed assets is charged to income applying the straight-line method over the useful life of the asset as disclosed in note 18.1 to the financial statements and after taking into account residual value, if significant. The residual values, useful lives and depreciation method are reviewed and adjusted, if appropriate, at each reporting date. Depreciation is charged on additions from the month the asset is available for use and on disposals upto the month preceding the month of disposal.

Gains and losses on disposals are determined by comparing proceeds with the carrying amount. These are included in the profit and loss account, in the period in which they arise.

Repairs and maintenance are charged to income as and when incurred.

5.7 Ijarah assets

Assets leased out under Ijarah arrangements are stated at cost less accumulated depreciation and accumulated impairment losses, if any. Cost includes expenditure that is directly attributable to the acquisition of the items. Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Modaraba and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the profit and loss account as and when incurred. The residual values, useful lives and depreciation method are reviewed and adjusted, if appropriate, at each reporting date.

Depreciation is charged to income applying the straight line method whereby the cost of an asset less residual value is written off over the standard hours of usage, which is considered to be the estimated useful life of the asset. Depreciation is charged on additions from the month the asset is available for use and on disposals upto the month preceding the month of disposal.

Gains and losses on disposals are determined by comparing proceeds with the carrying amount. These are included in the profit and loss account, in the period in which they arise.

5.8 Intangible assets

Intangible assets having a finite useful life are stated at cost less accumulated amortization and accumulated impairment losses, if any. Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only where it is probable that the future economic benefits associated with the asset will flow to the Modaraba and the cost of item can be measured reliably. Amortization is charged to income using the straight line method in accordance with the rates specified in note 19 to these financial statements after taking into account residual value, if any. The residual values, useful lives and amortization amortization method are reviewed adjusted, as appropriate, at each balance sheet date. Amortization is charged from the month the asset is available for use while in the case of assets disposed of, it is charged till the month preceding the month of disposal.

Intangible assets having an indefinite useful life are stated at cost less accumulated impairment losses, if any. These assets are not amortized as they are expected to have an indefinite life and are marketable.

Gain and loss on disposal of intangible assets, if any, are taken to the profit and loss account.

5.9 Impairment of non financial assets

The Modaraba assesses at each balance sheet date whether there is any indication that non financial assets excluding stock in trade may be impaired. If such indication exists, the carrying amounts of such assets are reviewed to assess whether they are recorded in excess of their recoverable amounts. Where the carrying value exceeds the recoverable amount, assets are written down to the recoverable amount and the difference is charged to the profit and loss account. The recoverable amount is the higher of an assets' fair value less cost to sale and value in use.

Where impairment loss for asset subsequently reverses, the carrying amount of the asset is increased to the revised recoverable amount but limited to the extent of initial cost of the asset. Reversal of impairment loss is recognised as loss.

5.10 Taxation

5.10.1 Current

The charge for current taxation is based on taxable income at the current rates of taxation after taking into account available tax credit and rebates, if any. Income for the purpose of computing current taxation is determined under the provisions of tax laws.

5.10.2 Deferred

Deferred tax is accounted for using the balance sheet liability method in respect of all temporary timing differences arising from difference between the carrying amount of the assets and liabilities in the financial statements and corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are recognised for all taxable temporary differences and deferred tax assets are recognised for all deductible temporary differences to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, unused tax losses and tax credits can be utilized.

Deferred tax is calculated at the rates that are expected to apply to the period when the differences reverse based on tax rates that have been enacted or substantively enacted by the reporting date. Deferred tax is charged or credited in the profit and loss account, except where deferred tax arises on the items credited or charged to equity in which case it is included in equity or when they relate to items recognised in other comprehensive income in which case it is recognised in the other comprehensive income.

5.11 Creditors, accrued and other liabilities

These are carried at amortized cost, which is the fair value of the consideration to be paid in the future for goods and services.

5.12 Provisions and contingent assets and liabilities

Provisions are recognised when the Modaraba has a present legal or constructive obligation as a result of past events, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the amount can be made. Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimates.

Contingent assets are not recognized and are disclosed unless an inflow of economic benefits is virtually certain. Contingent liabilities are not recognized and are disclosed unless the probability of an outflow of resources embodying economic benefits are removed.

5.13 Commitments

Commitments are disclosed in the financial statements at committed amounts.

5.14 Staff retirement benefits

Unfunded gratuity scheme

The Company operates an unapproved gratuity scheme for its employees completing the eligibility period of service as defined under the plan. The scheme provides for a graduated scale of benefits dependent on the length of service of an employee on terminal date, subject to the completion of minimum qualifying period of service.

Provisions are made to cover the obligations under the scheme on the basis of actuarial valuation carried out annually by an external expert, using the 'Projected Unit Credit Method'. All re-measurement gains and losses are recognized in statement of other comprehensive income as these occur. The amount recognized in the unconsolidated statement of financial position represents the present value of defined benefit obligations. The past service cost, current service cost and interest cost are recognized in the unconsolidated statement of profit or loss when they incurred.

5.15 Stock in trade

Stock of raw material, work in process and finished goods are measured at at the lower of cost and net realizable value. Cost is determined on first in first out basis. Cost of raw materials and trading stock comprises the invoice values and other charges paid thereon. Cost of work in process and finished goods include prime cost and appropriate portion of manufacturing overheads. Items in transit are stated at invoice value plus other incidental charges paid thereon up to the balance sheet date.

Net realizable value signifies the estimated selling price in the ordinary course of business less costs necessary to be incurred in order to make a sale. If the net realizable value is lower than the carrying amount, a write-down is recognized for the amount by which the carrying amount exceeds its net realizable value. Provision is made in the financial statements for obsolete and slow moving stock in trade based on management estimate.

The Modaraba reviews the net realizable value of items of stock in trade to assess any possible impairment on annual basis. Net realizable value is estimated with reference to the estimated selling price in the ordinary course of business less the estimated cost necessary to make the sale. Any change in the estimates in the future might affect the carrying amount of respective stock in trade with corresponding effects on the provision for impairment, if any.

5.16 Revenue recognition

5.16.1 Trading operations

Sales from trading operations is recognized when the Modaraba satisfies performance obligations by transferring goods to customer. Goods are transferred when the customer obtains their control, i.e. on dispatch of goods to customers. Sales is measured at fair value of the consideration received or receivable. Revenue from trading operation is recorded net of discount and taxes.

5.16.2 Ijarah

Ijarah rental is recognised on an accrual basis, as and when rentals become due on a systematic basis over the lease and Ijarah period.

Documentation charges, front end fee and other Ijarah income are taken to the profit and loss account when these are realised.

Gain / losses on termination on ijarah contracts are recognised as income as the difference between the proceeds realised from the customer on sale of ijarah assets and the net book value at which such assets are carried at the time of termination.

Income in respect of non-performing ijarah finance is held in suspense account, where necessary, in accordance with the requirements of Prudential Regulations for Modarabas issued by the SECP.

5.16.3 Musharakah Finance

Profit on musharakah finance is recognised on the basis of pre-agreed profit / loss sharing ratio when actual gain / loss on transaction is computed upon termination / completion of transaction.

5.16.4 Musawamah Finance

Profit on musawamah finance is recognized on an accrual basis, whereas unrealized musawamah income is excluded from profit.

5.16.5 Dividend Income

Dividend income is recognised when the Modaraba's right to receive the dividend is established.

5.16.6 Gain and loss on sale of investment

Gain and losses on sale of investments are accounted for when the commitment (trade debt) for sale of security is made.

5.16.7 Return on deposit with bank

Return on deposit with bank is recognized on an accrual basis.

5.16.8 Income from Shariah non-compliant revenue

Income from Shariah non-compliant revenue is not recognised in the profit and loss account and is classified as charity payable.

The sensitivity of the defined benefit obligation to changes in the weighted principal assumptions is:

	Change in assumptions	Increase in assumptions	Decrease in assumptions
		-----Rupees-----	
Discount rate	1%	4,443,981	5,497,386
Salary increase rate	1%	5,524,698	4,411,136

The average duration of the defined benefit obligation is 12 years.

The above sensitivity analysis is based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as and when calculating the gratuity liability recognised within the balance sheet.

24.1 The Finance Act 2008, introduced an amendment to the Worker's Welfare Fund Ordinance, 1971 (WWF Ordinance). Through these amendments Workers Welfare Fund (WWF) was payable @ 2% of the profit before taxation or taxable income whichever is higher. The legality of the above amendments were challenged in Sindh, Lahore and Peshawar High Courts. Due to variable judgments from the aforesaid Courts, the matter was forwarded to the Honorable Supreme Court of Pakistan. The Honorable Supreme Court has decided the matter on November 10, 2016, and Para 21 of its judgment states that the levy of WWF is in the nature of fee and the law could not be the amended by the money bill and as such amendments made in the year 2006 and 2008 are unlawful ultravires to the Constitution. In terms of judgment by the Honorable Supreme Court of Pakistan, WWF under WWF Ordinance, is no more payable by the Modaraba and provision made against WWF up till June 30, 2014 is reversed during the period. Subsequently the Sindh Assembly passed a bill on May 4, 2015 and notified Sindh Worker's Welfare Act 2014 on June 4, 2015.

As per the said Act the applicability of the Sindh Workers Welfare Fund is effective from the financial year of the entities ended on or after December 31, 2013. Accordingly, provision has been made at the rate of 2% of profit before taxation or taxable income, whichever is higher, effective after June 30, 2014.

26.1 In a suit filed with the Honorable High Court of Sindh in the year 1994 - 95, Modaraba has disputed the amount of duty and surcharge levied by the Collector of Customs on import of 1,901.472 metric tons of edible oil imported from Singapore. The Honorable High Court rejected the appeal and ordered to deposit amount for the disputed amount of duty. The Modaraba has filed an appeal in the Honorable Supreme Court against the decision of the Honorable High Court. The Honorable Supreme Court in its interim order allowed the Modaraba to get release of goods for which Modaraba has provided bank guarantee of Rs. 4.4 million against 10% cash margin and hypothecation charge on current assets until the matter is decided. The Modaraba, however, has fully provided for the duty and surcharge of Rs. 4,398,842, as claimed by the Collector of Customs.

27 CONTINGENCIES AND COMMITMENTS
27.1 Contingencies

Details of contingencies regarding Provision for Sindh Workers' Welfare Fund, Musawamah facility litigation against Quetta Textile Mills Limited and Provision for Custom Duty and Surcharge are disclosed in notes 24.1, 8.2 and 27.1 respectively.

27.1.1 PROVISION FOR SERVICE SALES TAX ON MANAGEMENT COMPANY'S REMUNERATION

The Sindh Revenue Board (SRB) has imposed Sindh Sales Tax (SST) on the Modaraba Management Company's remuneration with effect from 01 November 2011. However, certain modaraba management companies have approached the Honorable Sindh High Court (the Court) and Appellate Tribunal of SRB, challenging the levy of SST on management company's remuneration. The Modaraba Management Company has not received any demand notice from SRB for payment of SST on Management Company's remuneration and accordingly, based on legal advisor's opinion, can neither file any petition challenging the levy of SST on Management Company's remuneration nor can join the proceedings of pending petition in the Court. As a matter of abundant caution the management is accruing SST on Management Company's remuneration and will discharge the liability on direction of the Court based on outcome of the petition filed by other modaraba management companies.

The Modaraba's objective in managing risks is the creation and protection of Certificate holders' value. Risk is inherent in the Modaraba's activities, but it is managed through a process of ongoing identification, measurement and monitoring, subject to risk limits and other controls. The process of risk management is critical to the Modaraba's continuing profitability. The Modaraba is exposed to market risk (which includes profit rate risk and price risk), credit risk and liquidity risk arising from the financial instruments it holds.

The Modaraba primarily invests in Ijarah assets, diminishing musharakah, diversified portfolio of listed securities, and Islamic investments instruments. Such investments are subject to varying degrees of risk, which emanate from various factors that include but are not limited to:

- Credit risk
- Liquidity risk
- Market risk
- Operational risk

40.1 Credit risk

Credit risk is the risk of financial loss to the Modaraba if the counterparty to a financial instrument fails to meet its contractual obligations. The risk is generally limited to principal amounts and accrued interest thereon, if any. The Modaraba's policy is to enter into financial contracts in accordance with the internal risk management policies and the requirements of the Modaraba Rules and Regulations. The carrying amount of respective financial assets represents the maximum credit exposure at the reporting date.

Ijarah rental receivable, Diminishing musharakah facility and Investments

The Modaraba's policy is to enter into financial contracts in accordance with the internal risk management policies and the requirements of the Prudential Regulations for Modarabas issued by the Securities and Exchange Commission of Pakistan (SECP). The Modaraba aims to manage its credit risk exposure through diversification of its arrangements to avoid undue concentration of risks with individuals or groups of customers in specific locations or businesses. Credit risk is further mitigated through proper due diligence, appropriate transaction structuring and adequate collateralization of the exposure. In addition, the risk is mitigated through adequate takaful coverage of the assets under charge of the Modaraba. The respective collateral details against the Modaraba's exposure is detailed in notes of facilities and investments.

Long term deposit

Such deposit is refundable upon termination of services and management does not expect significant credit risk to arise there against.

An analysis of the financial assets that are individually impaired as per the requirements of the Prudential Regulations for Modarabas are as under:

	June 30, 2023		June 30, 2022	
	Balance outstanding	Provision held	Balance outstanding	Provision held
Musawamah facility (Classified Portfolio)				
Loss	22,000,000	(22,000,000)	25,000,000	(25,000,000)

Concentration of credit risk

Concentration of credit risk exists when changes in economic or industry factors affect groups of counterparties whose aggregate credit exposure is significant in relation to the Modaraba's total credit exposure. Concentration of credit risk indicate the relative sensitivity of the Modaraba's performance to developments affecting a particular industry.

The Modaraba manages credit risks and its concentration through diversification of activities to avoid undue concentration of risk with individuals, groups or specific industry segments. For this purpose, the Modaraba has established exposure limits for geographical and industrial sectors.

Details of the Modaraba's concentration of credit risk of financial instruments in respect of investments, diminishing musharakah and ijarah receivables industrial distributions with respect to segment assets are as follows:

40.2 Liquidity risk

Liquidity risk is the risk that the Modaraba will encounter difficulty in meeting its financial obligations as they fall due. Liquidity risk arises because of the possibility that the Modaraba will be required to pay its liabilities earlier than expected or will face difficulty in raising funds to meet commitments associated with financial liabilities as they fall due. The Modaraba's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Modaraba's reputation. The following are the contractual maturities of financial liabilities:

The table above shows the undiscounted cash flows of the Modaraba's financial liabilities on the basis of their earliest possible contractual maturity or settlement.

40.3 Market risk

Market risk is the risk that the fair value or future cash flows of financial instruments will fluctuate due to changes in market variables such as profit rates, foreign exchange rates and equity prices. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return.

40.3.1 Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Modaraba, at present, is not exposed to currency risk as all transactions are carried out in Pakistani Rupees.

40.3.2 Profit rate risk

Profit rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in the market profit rates. The Modaraba has adopted appropriate policies to minimize its exposure to this risk. The profit rate profile of the Modaraba's significant profit bearing financial instruments and the periods in which these will mature are as follows:

Fair value sensitivity analysis for variable rate instruments

As at the reporting date, variable rate instruments of the Modaraba represent cash and bank balances, Diminishing Musharakah, Sukuk and Islamic certificates. In case of 100 basis points increase/ decrease in profit rates on the last reporting date of variable rate instruments with all other variables held constant, the following will be the impact on the profit and loss account and the equity of the Modaraba.

	June 30, 2023		June 30, 2022	
	Increase in 100 basis points	Decrease in 100 basis points	Increase in 100 basis points	Decrease in 100 basis points
Cash and cash equivalent	217,097	(217,097)	929,746	(929,746)
Investments	100,000	(100,000)	50,000	(50,000)
Diminishing musharakah	377,850	(377,850)	860,255	(860,255)
	694,947	(694,947)	1,840,001	(1,840,001)

There are not fixed rate financial instruments as at June 30, 2023 and June 30, 2022.

The composition of the Modaraba's portfolio of financial instruments and profit rates are expected to change over time. Therefore, the sensitivity analysis prepared as June 30, 2023 is not necessarily indicative of the effect of the Modaraba's profit and loss and reserves due to changes in profit rates.

40.3.3 Price risk

Price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate as a result of changes in market prices (other than those arising from interest rate risk or currency risk) whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

The Modaraba is exposed to equity securities and mutual funds price risk because of investments held by the Modaraba and classified as 'FVTOCI' and "FVTPL". To manage its price risk arising from investments in equity securities, the Modaraba diversifies its portfolio.

In case of 10% increase/decrease in equity shares and investment in mutual funds held and classified as other comprehensive income for the year would be affected by Rs. 2.93 million (2022: Rs 0.31 million) as a result of gains/losses on investments classified as at FVTOCI and investment classified as FVTPL would be affected by Rs. 2.85 million (2022: Rs 5.27 million) as a result of gains/losses on investments classified as at FVTPL.

The analysis is based on the assumption that the equity index had increased / decreased by 10% with all other variables held constant and all the Modaraba's equity instruments moved according to the historical correlation with the index. This represents management's best estimate of a reasonable possible shift in the PSX 100 Index, having regard to the historical volatility of the index. The composition of the Modaraba's investment portfolio and the correlation thereof to the PSX 100 index, is expected to change over time. Accordingly, the sensitivity analysis prepared as of June 30, 2023 is not necessarily indicative of the effect on the Modaraba's net assets of future movements in the level of the PSX 100 Index.

40.4 Operational risk

Operational risk is the potential for loss resulting from inadequate or failed internal processes and systems, human error, or from impact of external events (including legal risks). Operational risk is inherent in the Modaraba's activities and, as with the other risk types, is managed through an overall framework with checks and balances that includes recognized ownership of the risk by the businesses, independent risk management oversight and an independent review by the Internal Audit.

The Modaraba considers the overall operational risk by breaking it down into different sub-components / areas called as operational risk sub-types under which operational risks are identified. The overall operational risk management responsibilities lie with the Operational Risk department. For the identified operational risks, operational risk control owners are put in place and made responsible for performance of checks and testing of identified controls in their areas and reporting of the same to the operational risk department which reports any exception or deviation to the Operational Risk Committee where corrective and preventive actions are taken.

41 CAPITAL RISK MANAGEMENT

The Modaraba's prime objective when managing capital is to safeguard the Modaraba's ability to continue as a going concern so that it can continue to provide optimum returns to its certificate holders' and benefits of other stake holders and to maintain a strong capital base to support the sustained development of its businesses. The Modaraba manages its capital structure by monitoring return on net assets and makes adjustments to it in the light of changes in economic conditions. In order to maintain or adjust the capital structure, the Modaraba may adjust the amount of profit paid to certificate holders or issue new certificates. The Modaraba is not subject to externally imposed capital requirements.

42 FAIR VALUE OF FINANCIAL ASSETS AND LIABILITIES

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Fair values are categorized into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).

Level 3: Inputs for the assets or liability that are not based on observable market data (that is, unobservable input).

If the inputs used to measure the fair value of financial asset fall into different levels of the fair value hierarchy, then the fair value measurement is categorized in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

Fair values of financial assets that are traded in active markets are based on quoted market prices. For all other financial instruments the Modaraba determine fair values using valuation techniques unless the fair value cannot be reliably measured.

For assets that are recognised in the financial statements at fair value on a recurring basis, the Modaraba recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred. There were no transfers between different levels of fair values mentioned above.

The table below shows the carrying amounts and fair values of a financial asset and financial liability including their fair value hierarchy for financial instruments measured at fair value.
